

UZUNG YOON

Dr. Uzung Yoon is an Assistant Professor of Anesthesiology and Director of Anesthesia Coagulation Laboratory at the department of Anesthesiology at Thomas Jefferson University Hospital, Philadelphia, USA. He graduated from Hannover Medical School, Hannover, Germany and Berlin School of Public Health with a master's degree in public health. He initiated training in vascular surgery in Berlin, Germany and completed his anesthesiology residency and a liver transplant anesthesiology fellowship at Thomas Jefferson University Hospital, Philadelphia under the mentorship of Dr. Yoogoo Kang and Dr. Elia Elia. He took over the anesthesia coagulation laboratory from Dr. Yoogoo Kang in 2018 and his current research interest is in clinical coagulation with the focus on viscoelastic assay. He has several years of molecular biology laboratory experience with caspase 8 knockout mice and received internal research awards and funding for his current coagulation research projects. He has more than 20 publications and a single authored book and is a reviewer for multiple international peer-reviewed journals.
