

Industry Invitation

International Liver Transplantation Society
**Perioperative Care in Liver Transplantation
Virtual Meeting 2020**

**PERIOPERATIVE CARE IN
LIVER TRANSPLANTATION
MEETING**

virtual

2020

OCTOBER 2-3, 2020

www.ilts.org

Dear Industry Partner,

We invite you to support our 2020 ILTS Perioperative Care in Liver Transplantation Meeting.

For many years ILTS has run a successful face-to-face meeting on perioperative care in liver transplantation. Given the situation with COVID-19, **the ILTS Perioperative Care in Liver Transplantation Meeting will be held virtually this year on October 2-3.** We see this change as an opportunity to expand the audience and reach members of the transplantation community around the world digitally. **The main target audience comprises anesthesia and critical care specialists. Nevertheless, the meeting also attracts consistently surgeons and hepatologists.**

This meeting is a unique opportunity for the anaesthesiologists, critical care physicians and other specialists in the field to learn about current developments in the field.

The ILTS Perioperative Care in Liver Transplantation Meeting is a CME-accredited event. The scientific program can be found [here](#).

Supporting the ILTS Perioperative Meeting will offer to your company, your brands, your products and services an innovative platform to engage with a targeted audience. We believe that Industry is an important part of the liver transplantation community and that your support and input, will contribute to create and enrich a vibrant and innovative event.

Claus Niemann, MD
ILTS President
*University of California San Francisco
San Francisco, CA, USA*

Dmitri Bezinover, MD, PhD
Programm Chair
*Penn State Hershey,
Hershey, PA, USA*

What medical specialties will be prominent?

- Anesthesiologists
- Critical Care Physicians
- Surgeons
- Transplant Coordinators
- Transplant Care
- Hepatologists

Expected Participants:

500+

What professional practice gap is the activity addressing?

The perioperative management of liver transplantation is a complex and evolving area of practice. New treatment modalities and techniques are being introduced during this meeting which have the potential to radically change practice in this area. Practitioners are encouraged to evaluate and incorporate these into their practice as appropriate.

Why is this event a unique platform?

Practitioners require information about novel techniques, therapies and policies so that they can understand the implications for their practice. Information specific to the management of liver transplant patients is rarely addressed in more general settings and can be difficult to synthesize from the available literature.

Learning Objectives

At the conclusion of this meeting, participants will be able to:

1. Discuss the influence of the COVID-19 pandemic on organ transplantation.
2. Recognize cardiac problems that can affect outcome after liver transplantation.
3. Differentiate and manage pulmonary dysfunction in transplant candidates and recipients.
4. Develop plans for the management of selected immunologic problems after transplant surgery.
5. Describe long-term postoperative challenges in liver transplant recipients.

Why Industry should support the ILTS Perioperative Care in Liver Transplantation Meeting?

Attendees are key opinion leaders in the purchasing process in their respective organizations. They are closely involved in the recommendation process for procurement and eager to be updated on the options existing on the market.
