

JIANG LIU

Jiang Liu graduated from Nankai University and obtained the MBBS and MS degrees in 2013. Then he joined the liver transplant research team led by Prof. Chung-Mau Lo and Prof. Kwan Man at Department of Surgery of the University of Hong Kong. He completed the post-graduate research training (under supervisions by Prof. CM Lo and Prof. K Man) and earned the PhD degree in 2018 after defending his thesis titled "The role of mitochondrial regulation in graft injury after liver transplantation". He then continued the post-doctoral fellowship at the University of Hong Kong for further translational and basic research on post-transplant acute complications as well as on preclinical hepatocellular carcinoma treatment using micro-scale biomaterials. In 2019, he moved to Beijing for proceeding with his surgical training at Tsinghua University-affiliated Beijing Tsinghua Changgung Hospital. His research interest covers molecular and cellular mechanisms, as well as therapeutic strategies for post-transplant graft injury and tumour recurrence. He also started to conduct clinical and translational studies in the field of liver transplantation in Beijing.

Dr. Jiang Liu is an active member of ILTS, TTS and Hong Kong Scientist Association. He has published his research findings in peer-reviewed journals like *Annals of Surgery*, *Small, Transplantation*, etc. He has presented his research works constantly in international and local scientific congresses 16 times and was awarded the Young Investigator Awards of ILTS in 2016 and 2018, as well as the Mentee-Mentor Award of TTS in 2016.
