

## JOHNS SHAJI MATHEW

Dr Johns currently works as Consultant in the department of HPB & Multi-organ transplant at Rajagiri Hospital, India. Dr. Johns Shaji Mathew completed his MBBS from Mahatma Gandhi University and subsequently went on to complete his MS in General Surgery from Annamalai University, Tamil Nadu. Following this he joined Amrita Institute of Medical Sciences for his MCh in Surgical Gastroenterology & for training in Solid Organ Transplantation. Dr Johns is a certified da Vinci® Xi robotic surgeon and has been part of the team that has performed over 150 robotic donor hepatectomies.

He is an active researcher involved in multiple clinical research trials and has published numerous articles in international journals. He was awarded the prestigious International Liver Transplant Society's Travel Scholar Award to work in Machine Perfusion of the liver at the Addenbrookes's hospital, Cambridge University, UK. His current interests include transplant oncology and minimally invasive liver surgery. Dr Johns hopes that with the help of ILTS, international collaborations can be made possible to answer questions that can shape clinical practice and translate to better outcomes. He also wishes to achieve uniformity in training and easier access to training opportunities at world class institutions for younger clinicians across geographic borders.
